

A large, stylized graphic of a blue glass building facade with a grid pattern, set against a blue sky with clouds. The word "MOKA" is displayed in large, white, 3D block letters on the upper part of the facade.

MOKA

Introductions Of M-Sign

Version : 1.0.4

V1.19.4_240112

Version Description

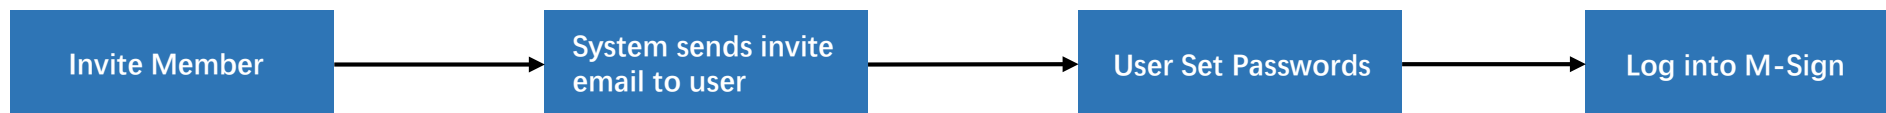

Version	Description
1.0.4	1. Added Workspace function
1.0.3	1. Optimized the page UI, such as the option buttons, H5 UI 2. Added the quick “Add” buttons on dashboard 3. Added the manual refresh button
1.0.2	1. Added user group function 2. Added schedule folder function
1.0.1	1. Optimized video wall and schedule layout 2. Added "ungroup" function for content 3. Adjusted the order of content types
1.0.0	Introduce M-Sign functions across dashboard, user, device, content, schedule, and system modules.

Introductions Of M-Sign Process

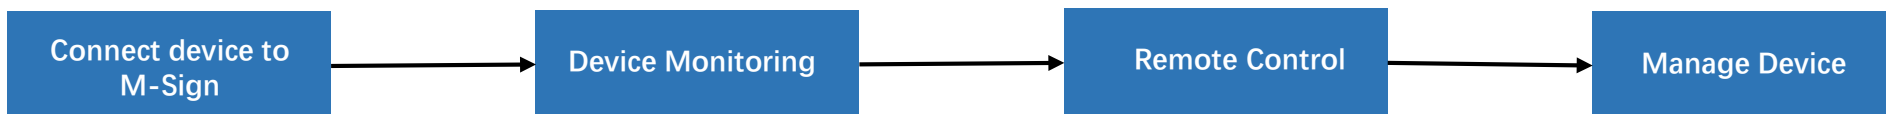

User

Invite team members to administer the M-Sign digital signage advertising delivery platform.

Device

Connect the terminal devices to M-Sign for management and control within the platform.

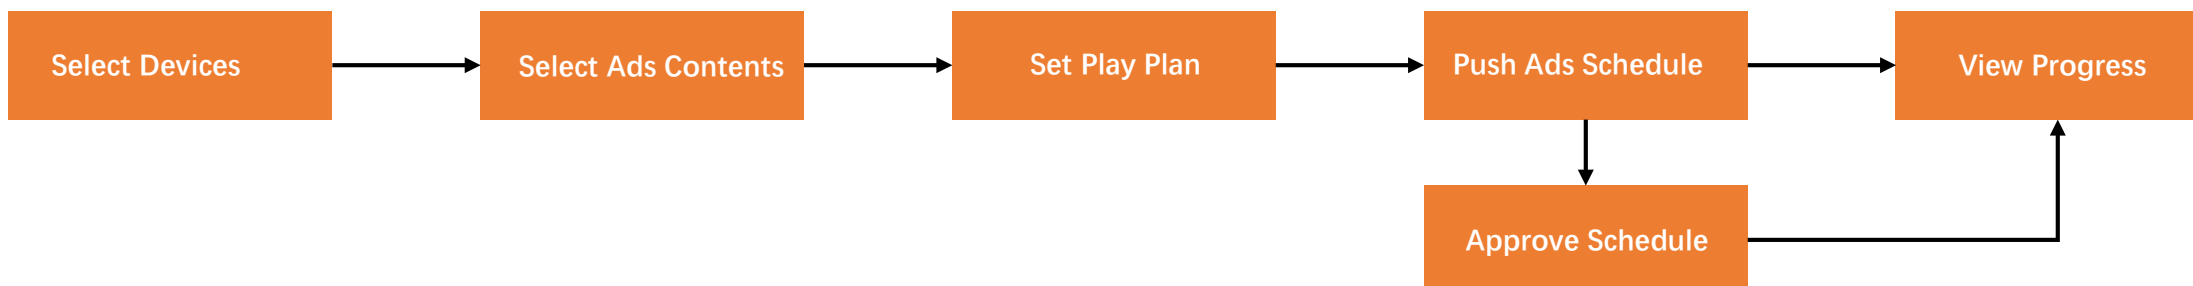

Content

Upload contents, or create composition H5/playlist contents, etc. to configure advertising campaigns.

Make Ads Schedules

Configure ad campaigns and publish ad content.

License Management

- A license is a legal agreement between the user and M-Sign services, granting permission to use the services to manage devices and ad content. Assigning licenses to devices unlocks M-Sign services for pushing the ads contents.
- Free:** The license is free from the device and can be bound to the device. If a device is removed from M-Sign, the device license will be unbound and returned to the Free status. Please use the license promptly before it expires.
- Effect:** The license is bound to the device and can be unbound to return to the free status.
- Expired:** The license has reached its validation period and cannot be used. When a device license expires, users are unable to push new content to the device via M-Sign.
- Remaining Assignments& Disabled:** A single license can be bound and unbound to the devices a maximum of 10 times. If the maximum number of assignments is reached, the license will be Disabled and cannot be used anymore.

Content
Video Wall
Sync Play

Schedule types

- Content - Push the selected contents to the devices.
- Video Wall - To push ads to a large display setup video wall consisting of multiple screens or monitors that are arranged together to form a single, cohesive visual display.
- Sync Play - Push selected ad content to devices and have them play in sync. The push ads process is the same with the Content Schedule.

Schedule Folder

- Support folder renaming, ungrouping the folder and moving schedules to the default folder, and deleting the folder along with its schedules.

2. Select devices to play the ads.

Why unable to select device?

- Unable to select both portrait and landscape devices at the same time.
- The device license is expired;
- Have no enough device storage for the new schedule;
- Device has been used on the video wall.

3. Select contents to play on the device screen.

- Unable to select contents because of the content format restriction.
- Horizontal content: Support H264, 4K/1080P, 30fps/60fps
- Vertical content: Supports H264, 1080P, 30fps
- Sort by horizontal and vertical to easily select the content.

OTA Approved History

You can view the OTA approved history on the page.

The background of the slide is a faded, blue-tinted image of industrial machinery, likely a robotic assembly line. It shows various mechanical components, metal frames, and some blue and yellow cables. The text "Together, Stronger!" is overlaid on this background.

Together, Stronger!
